Summary

Greetings! I'm a Mumbai-based Full-Stack Web and App Developer, currently pursuing my B.Tech degree. My heart beats for crafting digital wonders – websites, apps, and everything in between. As the CEO of SyntaxErreur, I've led us through numerous successful projects.

With a few years of experience under my belt, I've contributed to 7+ innovative projects. But that's not all – I'm also a video editor and graphic designer, adding versatile skills to my repertoire. Remarkably, I've achieved 2x national-level hackathon victories, a testament to my problem-solving prowess.

My philosophy is simple: embrace every challenge and let passion drive your path to success.

Experience
